Call for Action
Our Answer

Our bold purpose: Transform lives and unlock potential
A next generation utility
Transforming lives and unlocking potential through access to energy
A bold purpose that drives us all

At BBOXX, we are dedicated to transforming lives and unlocking potential through access to affordable, reliable and clean energy.

We see access to clean electricity, clean gas and other utilities as being fundamental in ensuring an acceptable quality of life.

This is the conviction of our company.
Our ambition: Becoming a next generation utility **platform**

We have the capacity to electrify a whole nation. Each country will have to rethink its strategy to deliver energy to its whole population. Diverse energy needs require different solutions to be managed simultaneously to achieve 100% electrification.

**We are the energy provider to solve energy poverty for the whole spectrum; we no longer differentiate between the off-grid and on-grid sector.** Our solutions are all managed in a way it has never been done before, through a comprehensive management platform called BBOXX Pulse.

We are taking quick steps to achieve our purpose by creating key prototypes: **Tomorrow’s Rural Home and Tomorrow’s Smart Communities.** These showcases prove that for anyone in energy poverty, living in a city or rural area, BBOXX is an enabler for all to live a healthier, wealthier and more connected future.
BBOXX Pulse and its key management modules for NGUs

**Call Centre**
An interface for dealing customer queries, recording calls and managing scripts

**Activity Tracker**
Allows staff to manage actions such as installations, repossessions & technical swaps

**CRM & Payment Services**
Pulse’s CRM integrates with payment services to allow payments to trigger remote switch on/off.

**Inventory & Deliveries**
Manages the warehouses, logistics & stock, with sub-location inventory & component level management

**Sales Agent App & Management**
Our app enables management of leads, applications, commissions and existing customers.

**Proactive Maintenance**
Pulse includes a powerful repairs tool that automates diagnostic tests and has in-built processes.

**Automated SMSs**
Pulse is integrated with SMS services. Partners can choose from a list of standard automated SMSs.

**Accounting**
Partners can choose either to export data for use in their own Accounting systems or use our platform.

**Product Telemetry**
Information connected hardware, including location, state of health and connectivity

**Reporting**
We provide a standard set of dashboards and KPIs for use by MDs and senior executives.
Our positive impacts in the world

Our purpose has positive environmental, social and economic impacts in the developing world. We directly contribute to 10 of the 17 UN Sustainable Developments Goals, with a sizeable impact on reducing inequalities. Our role is to answer the how the world will achieve these SDGs by 2030.
